Trainee in Salesforce Administration
Company: G4Flex Business & Services (CE, Brazil).
Period: 10/25/2021 – 01/30/2021.

Projects

Protechtor Gears: In this App you can check a list of passwords, which comes directly from an API, with the user being able to add, read, edit and delete passwords. It is the

result of a challenge for a Junior Flutter Developer Vacancy, which I was successful in passing.

Repository Link:https://github.com/Vini-Coding/BMI-Check

BMI Check: Calculate your BMI and discover if you are in your ideal body mass index and what is your body weight in a custom text with Health recommendations, and share with in social media. You can also change the height and weight metrics, switch between dark and light theme and choose your language from about 10 options available.
